Contents

1	Installation	1
2	Usage	3

CHAPTER 1

Installation

```
pip install django_cognito_jwt
```

CHAPTER 2

Usage

Add the following lines to your Django settings.py file:

```
COGNITO_AWS_REGION = '<aws region>' # 'eu-central-1'
COGNITO_USER_POOL = '<user pool>'    # 'eu-central-1_xYzaq'
COGNITO_AUDIENCE = '<client id>'
```

Also update the rest framework settings to use the correct authentication backend:

```
REST_FRAMEWORK = {
    'DEFAULT_AUTHENTICATION_CLASSES': [
        ...
        'django_cognito_jwt.JSONWebTokenAuthentication',
        ...
    ],
    ...
}
```
